

# RACK-MASTER

STORAGE SYSTEMS LIMITED

# If you need somewhere to store your long materials then we have the answer for you . . .

## Cantilever Racking

Either inside or outdoors Cantilever racking is a superb way of getting your over-long materials up off the floor and making the air space above work for you. Cantilever racking is a system that uses a common upright at the rear to support arms that cantilever away from it to allow non-palletised materials to be loaded into the system from the front. Virtually any length or weight can be achieved by simply adding more uprights with arms to increase the run length or capacity.

**RACK-MASTER STORAGE SYSTEMS** can supply and fit Cantilever racking systems within most warehouse environments or even outside in the yard with the racking system supporting its own roof canopy to prevent your products from being weather damaged if necessary.

Please contact us for more details and to arrange your free site survey.

### Products suited to Cantilever Racking:

- Structural Section
- Timber / Chipboard
- Flat Sheets
- Rod / Bar Lengths

# RACK-MASTER

## STORAGE SYSTEMS LIMITED

### RACK-MASTER STORAGE SYSTEMS

are suppliers and manufacturers of industrial storage equipment to all industrial sectors of the UK and beyond.

Our product range includes all forms of pallet racking, industrial / office shelving, motor parts storage racks, cantilever racking, mezzanine flooring, office and industrial partitioning as well as a wide range of general industrial products encompassing such items as picking ladders, small parts storage bins, workbenches etc.

With a fast, reliable and free design service, we can offer tailor made solutions designed to suit your exact needs that are second to none within our industry.

Our accomplished team has combined over 50 years of experience within the trade and we would welcome the opportunity to discuss any requirements that you should have either now or in the future.

We are great believers of providing the best service possible for our customers - no matter what their requirements - and we believe that there is no job too big or too small so if it is a fully automated warehouse storage system or a single bay of archive shelving that you require we will give you the attentive service that you require and deserve from the moment that we take your enquiry.

Not all of the services that we can provide are listed here as there are simply too many to list. Remember that we are the internal warehouse fit-out specialists so if you have a problem that you need solving, ask for our help so that we can work out a bespoke solution to suit your exacting needs. The sooner you call, the sooner we can start creating a more efficient future for you!

**Remember, if it goes in a warehouse**  
RACK-MASTER STORAGE SYSTEMS can help!!

- Pallet Racking
- Cantilever Racking
- Industrial / Office Shelving
- Mezzanine Floors
- Office / Industrial Partitions
- Labour only projects undertaken
- Health & Safety Damage Assessments
- General Industrial Products

# Is your warehouse over-run with pallets and other materials on the shop floor?

*If so then Pallet Racking IS the solution . . .*

## Pallet Racking

Pallet racking is the most common application found in warehouses that store and distribute palletised products. These systems come in all shapes and sizes designed to suit virtually any pallet specification and building dimensions when used with the correct materials handling equipment such as pedestrian stackers or forklift trucks.

Different types of pallet racking systems are available such as wide aisle pallet racking which is commonly used with a counterbalance forklift or a reach truck for single pallet selectivity, through to pallet live storage or push back racking which are designed for the densest storage capacity possible where the pallets are stored on roller beds to offer a first in-first out scenario or first in-last out scenario respectively.

**RACK-MASTER STORAGE SYSTEMS** can help to find the right system to suit your needs AND your budget. Please contact us to arrange your free site survey and feasibility study so that we can assess your requirements and provide you with some options.

- Wide Aisle Pallet Racking
- Narrow Aisle Pallet Racking
- Drive-In Pallet Racking
- Pallet Live Storage
- Push-Back Pallet Racking
- Carpet Racking
- Heavy Duty Sheet Racking
- Coil Racking

**RACK-MASTER STORAGE SYSTEMS** can offer you all of the above in Good Quality Used or Re-Conditioned Products at industry busting prices so if you have a big requirement and a relatively small budget get in touch and we will do our very best to help in any way we can!

# Have you outgrown your warehouse?

## Does the shop floor look smaller than it did when you moved in?

## Ever wondered how you could utilise all of that spare headroom in your building?

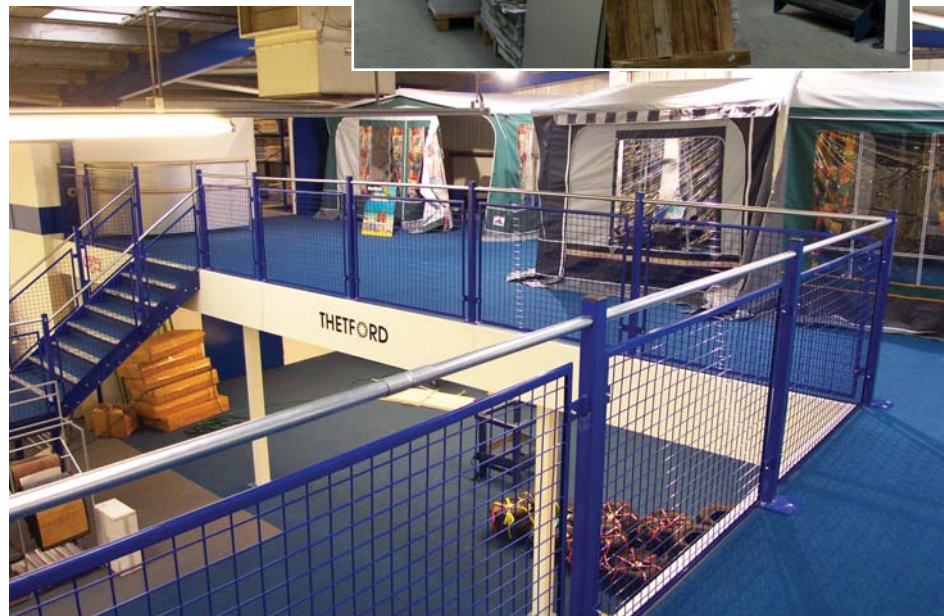

## Have you ever heard of a Mezzanine Floor?

### Mezzanine Flooring

If you have a warehouse typically 5.5M high or higher and you are only utilising the ground floor level, you can put in situ a Raised Storage Platform which is more commonly called a Mezzanine Floor. This is essentially a free-standing platform that can be positioned into a warehouse to utilise the space better (and remember Mezzanine Floors are exempt from local council rates) so you can double your floor space with minimal additional overhead costs.

Mezzanine Floors can be specified for virtually any application, whether you need to increase your office space or you wish to put in additional production lines or simply to gain more storage space, Mezzanine Flooring may be the solution for you!

If you need help to envisage how this could work for you, **RACK-MASTER STORAGE SYSTEMS** have many different case studies that we can present to you from similar industries to show you what the potential gains can be. We can even put together budget costs for Mezzanine Floors over the telephone, so don't delay, call us now to discuss your requirements further - you may not need a site visit!

### Mezzanine Floor Applications:

- Additional Storage Space
- Additional Offices
- Increased Production Space
- Training Rooms
- Pallet Gates to Existing Floors
- Additional Staircases
- Fire Rating Existing Floors
- Alterations to Existing Floors

# Are small boxes your problem or are you having trouble finding things in your picking or archive system?

*If so then Shelving IS the solution...*

## Industrial / Office Shelving

Shelving comes in all different shapes, sizes and finishes ranging from Heavy Duty Industrial Longspan Shelving for bulkier items through to Industrial Shortspan Shelving for smaller products or Office Shelving to take lever arch / archive files. We can even put walkways in High Bay Shelving Systems eliminating the need (and cost!) of a mezzanine or fit the shelves with roller beds to optimise the efficiency of your picking system with a live stock replenishment in-feed system known as Carton Live Picking.

Whatever your requirement, **RACK-MASTER STORAGE SYSTEMS** have a wealth of solutions that we can tailor to your individual requirements. Please call us to discuss your requirements further – you may not even need a site visit!

### Systems we can offer you:

- Longspan Shelving
- Shortspan Shelving
- Archive Shelving
- Motor Parts Storage Racks
- Multi-Tier Shelving Systems
- A-Frame Lean-To Racks
- High Bay Shelving
- Carton-Live Picking Racks

As with all our Storage Systems, **RACK-MASTER STORAGE SYSTEMS** carry stocks of used shelving and we can offer you all of the above in Good Quality Used or Re-Conditioned Products at industry busting prices so if you have a big requirement and a relatively small budget get in touch and we will do our very best to help in any way we can!

# General Industrial Products & Accessories

There are far too many different General Industrial Products and Accessories to list here but rest assured, **RACK-MASTER STORAGE SYSTEMS** can provide a wealth of solutions from our vast experiences.

If your requirement is to do with picking and packing systems or general storage equipment accessories we can help!

Be it Packing Benches, Lockers, Wrapping Machines, Barriers, General Workshop Equipment please give us a call to see what we can offer as a solution to your requirements.

- Packing Benches
- Pedestrian & Industrial Barriers
- Anti-Collapse Safety Mesh
- Lockers
- Racking Guards
- Wrapping Machines
- Conveyors
- General Workshop Equipment
- Timber / Chipboard Shelves
- Safety Step Ladders
- Pallet / Sack Trucks

All of these can be offered at highly competitive prices so please give us a call and see what we can do to help! Again our product range is so diverse that it would be impossible to list everything that we do so remember if it goes in a warehouse, **RACK-MASTER STORAGE SYSTEMS** can help!

## We buy your used Pallet Racking and Shelving Systems - for Cash!

As a dedicated supplier to many businesses, we are constantly on the look-out for used Pallet Racking and Shelving Systems to replenish our fast moving stock levels.

If you are down-sizing and have excess materials to dispose of then please give us a call to discuss the matter further. Once a price has been agreed we can handle everything from start to finish such as providing labour to dismantle the equipment and then loading them onto our wagons for removal from site, making things that bit easier for you.
